cane that meteorologists always look for in October.

At 8 o'clock this morning the information received at the local weather bureau, was that the hurricane was central off the coast of Georgia and Carolina, and was bowling along at the rate of between thirty and forty miles an hour.

Mr. Smith said that it was more furious than the gale which wrecked the steamship City of Savannah. There is only one storm, however, so there is no danger of colliding winds to form a cyclone.

danger of colliding winds to form a cyclone.

The greatest velocity of wind was 1e-corded at Wilmington, N. C., where it was stoying with telegraph poles and Carolina groves at the rate of 34 miles an hour, and 12 miles an hour here, showing that the hurricane's advance guard is rapidly coming North.

The accompanying downfall of rain is tremendous, it having been 3.98 inches at Savannah for the twenty-four hours ending at 8 o'clock.

At Mobile the temperature was 78 degrees and at Montgomery 58 degrees, which are not unusual records for this time of year. Mr. Smith said the mercury would probably take a sudden drop after the storm passes and that the work themselves. Their luggers and and other fishing craft will be raised.

Peter Frey, who has just returned from Cheniere Caminada, says that on Monday night seventy-five bodies were picked up on the seashore thirty miles away, while forty corpses were found at the other end of Grand Island.

The majority of the survivors are children who have lost their parents and relatives. Many scoundreis, mostly from New Orleans, flocked to the afflicted section and have stolen the furniture, picked up along the shore, robbed the dead and stole from the living as well as talling rations given out to deserving people.
